Tushar Gupta

Senior Manager | Enterprise Operations & Business Strategy | SaaS & IT Governance | Coworking & Managed Services | Business Transformation |

Noida, 201301
8802833751
tushar21890@gmail.com
Date of Birth: 21 Aug 1990

PROFESSIONAL SUMMARY

Dynamic Business Head, Senior Manager, and Technology-driven Business Strategist with hands-on experience in Business Development, CRM Strategy, SaaS Product Development, IT Operations, Coworking & Managed Services, Enterprise Sales Planning, Recruitment Technology, and Cross-functional Team Leadership. Experienced in building business verticals from scratch, driving operational scale, implementing automation workflows, leading digital transformation initiatives, and aligning technology with business growth.

Strong expertise in CRM architecture, enterprise account intelligence, MCA data analysis, sales strategy planning, lead lifecycle management, SEO & digital growth, SaaS workflow planning, cloud-based tools, and IT infrastructure management. Worked closely with leadership teams and CEOs to create scalable operational frameworks, ticketing systems, recruitment automation processes, and business expansion strategies.

Known for creating structured SOPs, training frameworks, business intelligence models, proactive operational systems, and scalable growth strategies across multiple verticals.

CORE SKILLS

- Team Management & Leadership
- Helpdesk & Ticketing Operations
- Customer Support & Escalation Handling
- Client Relationship Management
- Digital Marketing Operations
- Campaign Planning & Coordination
- Lead Generation & Qualification
- CRM & Internal Tools Handling
- Process Setup & Operations Management
- Email & Call Management
- Reporting & Coordination
- Business Operations
- Community Management
- Communication & Problem Solving
- Team Coordination & Training

PROFESSIONAL EXPERIENCE

Innova AM Tech Private Limited

Senior Manager | Business Development Manager | Manager | Business Analyst
August 2021 – Present

Business Operations & Enterprise Strategy
July 2020 – July 2021

Responsible for strategic business operations, enterprise intelligence systems, SaaS governance, IT operations, CRM architecture, coworking business expansion, AI recruitment workflows, enterprise sales planning, operational governance, and integrated technology-business ecosystems.

Core Functional Ownership

Business & Strategic Leadership

- Business Strategy & Expansion
- Strategic Operations Management
- Business Development
- Revenue Growth Planning
- Enterprise Account Management
- Cross-functional Leadership
- Organizational Governance
- Business Transformation
- Customer Lifecycle Management
- Operational Excellence
- Process Optimization
- KPI & Performance Management
- Workforce Planning
- Business Forecasting
- Vendor Management
- Stakeholder Management

Marketing & Growth

- SEO Strategy
- Lead Generation
- Organic Growth Strategy
- LinkedIn Growth Strategy
- Digital Campaign Coordination
- GMB Optimization
- Marketing Operations Alignment
- Brand Visibility Planning

Enterprise Intelligence & CRM

- Enterprise CRM Management
- MCA Data Intelligence
- Business Intelligence Mapping
- Industry Segmentation
- Account Intelligence
- Lead Lifecycle Management
- MQL & SQL Management
- Market Research & Competitor Analysis
- Data-driven Decision Making
- Enterprise Targeting Strategy
- Procurement & Decision-Maker Mapping

Coworking & Managed Services

- Coworking Operations Management
- Community Management
- Workspace Operations
- Helpdesk Operations
- Customer Experience Management
- Complaint & Escalation Handling
- Facility Operations Coordination
- Proactive Service Management

Technology & IT Governance

- IT Governance
- SaaS Operations Management
- Incident Management
- Ticketing Systems
- IT Infrastructure Planning
- Cloud Operations Governance
- Technology Operations
- Service Delivery Management
- Escalation Management
- TAT Monitoring
- Operational Monitoring
- System Documentation & KT Governance
- Infrastructure & Network Coordination

Recruitment & Staffing Operations

- IT Staffing Operations
- Recruitment Lifecycle Management
- Talent Acquisition Strategy
- Contractual Workforce Management
- Permanent Hiring Operations
- Recruitment Process Optimization
- Recruiter Productivity Planning
- LinkedIn Talent Strategy
- Employer Branding Support

SaaS & Product Operations

- SaaS Workflow Management
- Product Operations
- AI Recruitment Workflow Planning
- Internal Tool Governance
- Sprint Monitoring
- Jira Workflow Coordination
- CRM Workflow Automation
- Process Automation
- API Integration Coordination
- Product Lifecycle Understanding

Leadership & Training

- Team Leadership
- Team Building
- Operational Training
- SOP Development
- Process Documentation
- Cross-team Coordination
- Organizational Training
- Performance Coaching

Major Business Verticals Managed

1. **AV Solutions & Devices**
2. **IT Staffing & Services**
3. **Coworking & Managed Services**
4. **SaaS Platforms & Internal Technology Ecosystems**

Core Leadership & Business Responsibilities

- Managed and led multiple business verticals including:
  - AV Solutions & Devices
  - IT Staffing & Services
  - Coworking & Managed Services
  - SaaS & Internal Technology Platforms
- Worked closely with senior leadership and the CEO to build scalable operational frameworks, business expansion strategies, technology processes, and enterprise growth models.
- Handled strategic planning across sales, operations, CRM management, marketing alignment, IT infrastructure, business intelligence, SaaS product workflows, and process automation.
- Led business process optimization initiatives and implemented structured SOPs, documentation systems, training workflows, and operational governance models.
- Functioned in a Business Head + Technology Leadership capacity by driving business strategy, IT operations, cloud systems, SaaS tools, workflow automation, and infrastructure planning.

Enterprise CRM, Data Intelligence & Business Strategy

- Managed the organization's CRM ecosystem and enterprise account intelligence processes.
- Introduced MCA-based enterprise data integration strategy to scale target account acquisition.
- Expanded structured enterprise targeting capabilities from approximately 7,324 companies to 4,00,000+ enterprise records through MCA-based business intelligence integration and structured data governance.
- Built enterprise-level decision intelligence datasets including:
  - Procurement Heads
  - IT Heads
  - Admin Heads
  - HR Contacts
  - Decision-making stakeholders
  - Operational business contacts
- Created a structured enterprise ecosystem where sales and business teams could identify:
  - What products/services should be pitched
  - Which department should be targeted
  - Who the decision makers were
  - What the company's buying potential could be
  - Which vertical would have maximum sales probability
- The operational philosophy behind the CRM ecosystem was that once the organization had structured enterprise intelligence, business opportunities could be generated across multiple verticals simply by aligning the correct products, services, and business approach.
- Designed multi-layer industry classification frameworks:
  - Industry Level 1 (Services, Trading, Manufacturing, etc.)
  - Industry Level 2 (Financial Services, IT Services, etc.)
  - Industry Level 3 (Banking, Specialized Segments, etc.)
- Built strategic frameworks for:
  - GCC targeting
  - MNC targeting
  - Paid-up capital analysis
  - Government vs Private entity classification
  - Subsidiary and holding company mapping
  - Employee strength estimation using PF portals and annual reports
  - Revenue and turnover-based account potential analysis
- Created account segmentation and business prioritization models based on:
  - Sales potential
  - Employee strength
  - Turnover capability
  - Expansion possibility
  - Existing vs New Business opportunities

- Established scalable lead intelligence and business forecasting approaches for sales and account management teams.

AV Solutions & Devices Vertical

Strategic Business Operations & Market Planning

- Managed complete account targeting strategies for AV Solutions & Devices vertical.
- Created enterprise account sets for sales and business development teams.
- Conducted business performance analysis by evaluating:
  - Projected targets
  - Actual achievement
  - Circle-wise performance gaps
  - Market opportunities
- Introduced Existing Business (EBT) and New Business Target (NBT) operating models to improve sales accountability and growth planning.
- Built competitor intelligence frameworks after enterprise-level market discussions and comparative analysis.
- Worked closely with marketing teams for:
  - SEO strategies
  - Keyword planning
  - Digital visibility enhancement
  - Paid and organic marketing direction
  - Website growth alignment

- Helped create structured business development workflows aligned with enterprise account potential.

IT Staffing & Services Vertical

Recruitment Technology, SaaS Workflow & Business Operations

- Built operational workflows for IT staffing and services business from scratch.
- Developed deep understanding of the full recruitment lifecycle including:
  - Client acquisition
  - Requirement mapping
  - Talent sourcing
  - Candidate onboarding
  - Salary processing understanding
  - Client servicing workflows
  - End-to-end recruitment operations
- Designed and led strategic operational frameworks for scaling recruitment productivity and process automation.
- Led internal SaaS product planning and workflow structuring for:
  - JobMojo.ai
- Coordinated with technology teams for platform development using:
  - AngularJS
  - Node.js
  - MongoDB
  - React.js

    - Google Cloud Platform (GCP)
    - Microsoft Exchange Server
    - WATI Integration
    - Calling APIs and communication integrations

- Helped build AI-assisted recruiter productivity workflows aimed at increasing recruiter efficiency and submission capacity.
- Contributed to business transition strategy that reduced dependency on traditional job portals and focused on:
    - Organic LinkedIn growth
    - Talent community building
    - Direct candidate acquisition strategies
    - Employer branding
- Created structured SOPs, workflow governance, and role-based operational systems for recruitment and account management teams.
- Implemented business segmentation models separating:
    - Existing Business Accounts
    - New Business Growth Accounts
- Worked on contractual workforce retention planning through:
    - Engagement campaigns
    - Town hall processes
    - Workforce continuity initiatives
    - Business sustainability planning
- Defined monthly and yearly business target frameworks for:
    - Contractual hiring
    - Permanent hiring
    - Revenue-linked business performance

- Closely monitored operational performance and business growth across the staffing ecosystem.

Coworking & Managed Services Vertical

Business Expansion, Operations & Community Management

- Worked closely with leadership to help establish coworking and managed office operations post-COVID.
- Supported initial operational setup and service workflows starting from H57 Sector 63.
- Designed and implemented:
    - Helpdesk processes
    - Ticketing workflows
    - Operational escalation systems
    - Service management structures
- Personally handled initial helpdesk operations during early-stage business setup to stabilize customer experience workflows.
- Supported go-to-market planning through:
    - Hoardings
    - Local area visibility

    - SEO initiatives
    - GMB optimization
    - Lead generation strategies
    - Competitor analysis
- Contributed to scaling the coworking vertical from:
    - 1 location to 6 operational sites
    - Approximately 156 companies
    - Approximately 1,856 members
- Managed and structured:
    - MQL to SQL conversion processes
    - Lead lifecycle management
    - CRM-based customer tracking
    - Customer preference intelligence
    - Data-driven expansion planning
- Built proactive hospitality-focused operational models emphasizing:
    - Customer experience
    - Preventive issue management
    - Service quality consistency
    - Retention-focused operations
- Worked on community management process structuring, onboarding systems, operational checklists, and issue prevention mechanisms.
- Led operational planning and business strategies contributing to growth from zero to approximately INR 1.36 Cr monthly business scale.

SaaS Products, Technology & IT Leadership

Technology Operations & Product Governance

- My Team worked with technology and product teams on multiple SaaS platforms and internal tools.
- Contributed to architecture planning, operational workflows, sprint tracking, and system scalability initiatives.
- Coordinated development workflows across products hosted on:
    - AWS
    - Google Cloud Platform (GCP)
- Managed cross-functional coordination for:
    - Ticketing systems
    - Campaign systems
    - Internal workflow tools
    - User management
    - CRM integrations
    - Documentation systems
- Ensured operational continuity through structured KT (Knowledge Transfer) processes and complete documentation-driven workflows.
- Helped streamline Jira sprint tracking and operational monitoring processes.
- Governed complete IT planning and operational infrastructure strategy across coworking sites and business verticals.

- Functioned as the operational decision-making authority for infrastructure governance, resource planning, technology allocation, operational support structure, and system continuity.
- Defined how operational IT ecosystems would function including:
  - Access point planning
  - Internet infrastructure strategy
  - Device allocation planning
  - Shift-based resource planning
  - Manpower allocation
  - Network reliability planning
  - Incident response structures
  - Operational support hierarchy
  - Building-level technology governance
- Structured operational systems in a way where entire coworking buildings and operational ecosystems were managed through centralized workflows and system-driven governance.
- Built organization-wide visibility systems where operational data, incidents, workflows, escalations, tickets, customer details, and support history remained centrally tracked and recorded.
- This approach significantly improved:
  - Communication efficiency
  - Team coordination
  - Operational transparency
  - Accountability
  - Incident tracking
  - Resolution management
  - Service continuity
  - Operational reporting
- Implemented structured ticketing and operational monitoring frameworks where teams could track:
  - When incidents were raised
  - Response timelines
  - Resolution timelines
  - TAT (Turn Around Time)
  - Escalation status
  - Team accountability
  - Operational bottlenecks
- Helped establish proactive governance models to reduce recurring operational issues and improve overall service reliability across locations.
- Supported enterprise client IT requirements including:
  - IP phone setup
  - IT infrastructure coordination
  - Configuration planning
- Worked on cost optimization planning for technology operations and cloud infrastructure management.

Cross-Functional Business Integration Strategy

- Helped establish integrated business solution approach across all verticals.
- Designed strategic business alignment where a single client could leverage multiple business verticals through one integrated ecosystem.
- The strategic approach was built around the philosophy that once a customer entered the organization ecosystem, every major operational and technology requirement could be fulfilled internally.

Example Business Flow:

- If a startup or enterprise required office space:
  - Coworking & Managed Services vertical supported workspace requirements.

- If the same organization required laptops, AV devices, meeting room setups, headphones, collaboration devices, or IT hardware:
  - AV Solutions & Devices vertical supported infrastructure requirements.

- If the organization required workforce hiring:
  - IT Staffing & Services vertical supported recruitment and staffing requirements.

- If operational scaling, managed services, or technology support was required:
  - Internal technology and operational ecosystems supported business continuity.

- This integrated ecosystem approach helped improve:
  - Cross-selling opportunities
  - Client retention
  - Long-term account relationships
  - Enterprise account penetration
  - Revenue scalability
  - Business dependency within the ecosystem

- Enterprise account managers were strategically aligned as central touchpoints for complete client lifecycle management across all verticals.

- Worked with account management structures to improve customer lifecycle engagement and cross-vertical business opportunities.
- Supported vendor management operations by helping establish:
  - Product pricing controls
  - Part number management
  - Margin protection processes
  - Vendor registration workflows
  - Pricing reconciliation systems

- Introduced structured product and pricing governance processes in 2023 to improve operational transparency and business efficiency.

Training & Organizational Development

- Acted as an internal trainer for multiple verticals and newly hired employees.
- Conducted onboarding and foundational business training across departments.
- Created operational training frameworks for:
  - CRM usage
  - Business processes
  - Recruitment workflows
  - Helpdesk operations
  - Ticketing systems
  - Lead management
  - Service operations

- Worked closely with leadership teams to establish structured learning and role-transition workflows.

Technical & Business Skills

Business & Operations

- Business Strategy
- CRM Management
- Enterprise Sales Planning
- SaaS Operations
- Business Intelligence
- Market Research
- Competitor Analysis
- Lead Management
- MQL & SQL Management
- Process Automation
- SOP Development
- Vendor Management
- Account Segmentation
- Business Forecasting
- Team Leadership
- Cross-functional Coordination
- Community Management
- Customer Lifecycle Management
- Recruitment Operations
- Workforce Planning
- Revenue Planning
- Training & Development

Technology & Platforms

- AngularJS
- Node.js
- MongoDB
- React.js
- MySQL
- Google Cloud Platform (GCP)
- Amazon Web Services (AWS)
- Microsoft Exchange Server
- Jira
- API Integrations
- CRM Systems
- Ticketing Systems
- SaaS Platforms
- Workflow Automation

INNOVA Communication – Vodafone Processes
Process Manager
June 2015 – July 2020

- Managed operational processes, workforce planning, SLA governance, and customer service operations for Vodafone processes.
- Maintained performance governance across customer satisfaction, operational efficiency, and manpower forecasting.
- Worked on reporting systems, operational metrics, process governance, and escalation management.
- Conducted performance management, employee development, and operational quality improvement activities.
- Managed TAT-driven operational environments and process optimization workflows.
- Handled international online data mining projects and annual employee study reports.

Wipro Limited
Team Lead – SaaS Support & Incident Management
May 2014 – April 2015

- Worked within SaaS support and incident management environments supporting enterprise application workflows.
- Managed operational teams handling incident logging, issue resolution coordination, escalation management, and service continuity processes.
- Worked on project-based operational support involving ASP.NET-based applications and enterprise support systems.
- Coordinated with support and technical teams to ensure incidents, tickets, and operational issues were resolved within defined TAT timelines.
- Monitored and governed:

        - Incident management workflows
        - Ticket resolution processes
        - Escalation handling
        - Service quality
        - Operational reporting
        - Productivity governance

- Conducted operational tracking and reporting for system incidents and customer-impacting operational issues.
- Worked closely with teams to improve operational efficiency, service responsiveness, and issue resolution effectiveness.
- Managed team performance, operational coordination, productivity monitoring, and support governance activities.
- Gained hands-on exposure to SaaS operational environments, enterprise support workflows, ticketing ecosystems, and service governance processes.
- Strengthened operational leadership capabilities involving:
    - Incident management
    - SaaS operational governance
    - Escalation handling
    - TAT monitoring
    - Team coordination
    - Process optimization
    - Operational reporting

IENERGIZER – Samsung Process
Operations Team Lead
September 2012 – 2014

- Worked within Samsung technical support operations handling enterprise and consumer-level technical incidents related to Samsung devices and support ecosystems.
- Managed operational support environments where incidents and technical tickets were generated for:
    - Handheld mobile device issues
    - Laptop-related technical problems
    - Device configuration support
    - Software-related troubleshooting
    - Customer technical assistance
- Coordinated customer support workflows through:
    - Ticket logging systems
    - Chat-based support
    - Call-based technical support
    - Incident resolution processes
    - Escalation management
- Worked on resolving and coordinating technical incidents by ensuring tickets were properly analyzed, assigned, tracked, and closed within operational TAT timelines.
- Managed operational support teams handling:

    - Technical troubleshooting
    - Incident closure
    - Customer interaction management
    - Resolution tracking
    - Service quality monitoring
    - Escalation coordination
- Monitored TNPS, operational productivity, resolution efficiency, customer handling quality, and technical support responsiveness.
- Conducted operational reporting and quality improvement sessions to improve customer experience and service resolution effectiveness.
- Promoted to escalation handling responsibilities and later Team Lead role based on operational performance, incident management capability, and customer handling efficiency.
- Received multiple performance recognitions including Best Associate awards for operational excellence and customer support performance.
- Gained early exposure to:
    - Technical support ecosystems
    - Ticketing environments
    - Incident management workflows
    - TAT-driven support operations
    - Escalation governance
    - Customer support operations

Key Achievements

- Started professional career with Samsung process operations and received multiple performance recognitions including Best Associate awards.
- Promoted to Escalation Handling Queue within initial months based on operational performance and customer handling capabilities.
- Progressed into Team Leadership and Operations Management roles through consistent operational performance, customer handling excellence, and people management capabilities.
- Progressed from Business Analyst to Manager, Business Development Manager, and Senior Manager roles within INNOVA ecosystem.
- Played a strategic role in scaling enterprise intelligence database from approximately 7,324 companies to 4,00,000+ structured enterprise records.
- Built enterprise datasets containing Procurement Heads, IT Heads, Admin Heads, HR contacts, and key decision makers to improve business targeting and enterprise sales conversion.
- Helped scale coworking and managed services business from initial setup stage to approximately INR 1.36 Cr monthly business operations.
- Contributed to expansion from a single coworking site to 6 operational sites.
- Played a strategic role in managing operations for approximately 156 companies and 1,856+ members.
- Built structured enterprise intelligence and CRM frameworks using MCA-based data strategies.
- Led workflow planning and operational structuring for AI-assisted recruitment platform JobMojo.ai.
- Reduced dependency on traditional hiring platforms through LinkedIn-focused organic talent acquisition strategies.
- Introduced structured vendor pricing and product governance models improving operational control and transparency.

- Built scalable SOPs, documentation systems, training structures, and workflow governance processes across multiple business verticals.
- Managed operational governance involving technology infrastructure, manpower planning, TAT monitoring, ticketing systems, and business continuity frameworks.

Academic Qualification

- B.Tech (Information Technology) – 2014
- Intermediate (PCM) – U.P. Board – 2008
- Matriculation – U.P. Board – 2006

Linguistic Proficiency

- English
- Hindi

Personal Attributes

- Strong leadership and team management capabilities
- Business and operational problem-solving mindset
- Customer-centric approach
- Aggressive target-oriented personality
- Strategic and analytical thinking
- Strong communication and interpersonal skills
- Operational governance and execution capabilities
- Ability to work across multiple business verticals simultaneously
- Strong process-building and documentation mindset

Additional Information

- Worked closely with top leadership and CEO-level strategic initiatives across multiple business verticals.
- Known internally as a cross-functional operational leader managing business, technology, process governance, and customer operations together.
- Strong understanding of enterprise business ecosystems, SaaS operations, technology governance, operational scalability, and integrated business models.
- Extensive exposure in CRM intelligence, recruitment technology, coworking operations, IT governance, customer lifecycle management, and operational automation.
- Proven ability to build operational systems, business workflows, SOPs, governance structures, and scalable business ecosystems completely from scratch.
- Experience in managing enterprise operations from strategic planning level to execution-level governance.

Declaration

I hereby declare that the above-mentioned information is true to the best of my knowledge and belief.
