PROFESSIONAL SUMMARY

Full Stack Developer with experience in building scalable web applications using JavaScript, React.js, Node.js, Express.js, and MongoDB. Skilled in REST API development, secure user access, AI feature integration, and responsive frontend design. Strong understanding of end-to-end application flow, database modeling, authentication, and deployment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Sass
Backend: Node.js, Express.js, RESTful APIs
Databases: MongoDB, Mongoose
Tools and Cloud: Git, GitHub, Render, Netlify
Authentication and Security: JWT, password hashing, Cookie Parser, CORS

PROJECTS

Interlyst AI — AI-Powered Interview Preparation & Resume Tailoring Platform | 2025

- Developed a full-stack AI-powered interview preparation platform using React.js, Sass, Node.js, Express.js, MongoDB, Mongoose and Google Gemini API using Google Generative AI SDK, enabling users to generate personalized interview reports from job descriptions and resume PDFs.
- Built responsive frontend modules with React Router, Context API, Axios, custom hooks, and protected routing, supporting user login, registration, protected home access, interview plan listing, and report viewing.
- Created 8 REST endpoints, including 4 user-access routes and 4 interview-processing routes, with JWT verification, password hashing, CORS configuration, Express middleware, route protection, and token blacklist support.
- Integrated AI-driven workflows using Multer for file uploads, PDF parsing for resume extraction, Zod for schema validation, and Puppeteer for report generation, generating ATS-optimized resumes and PDF reports deployed on Render.

FinLedger Core — Secure Fintech Transaction Backend | 2025

- Engineered a secure backend ledger system with Node.js, Express.js, MongoDB, Mongoose, and 8 API endpoints for user authentication, account creation, balance inquiry, fund transfer, and account funding.
- Implemented secure authentication and session management using JWT, hashed passwords, token verification, logout handling, and token blacklist validation.
- Architected 5 Mongoose schemas for users, accounts, transactions, ledger entries, and blacklisted tokens, with schema validation, indexed fields, account status tracking, unique idempotency keys, and immutable ledger records.
- Implemented a transaction workflow with ledger-based balance calculation, DEBIT and CREDIT entries, duplicate transaction prevention through idempotency keys, transaction status tracking, and automated email notifications.

EDUCATION

- **Master of Computer Applications (MCA)**
  SGT University, Gurugram | 2024 – 2026 | Current CGPA: 8.64/10

- **Bachelor of Computer Applications (BCA)**
  Maharshi Dayanand University, Rohtak | 2019 – 2022 | Percentage: 64.5%

CERTIFICATIONS

- AWS Solutions Architecture Job Simulation – Forage | 2026
- JPMorgan Chase & Co. Software Engineering Job Simulation – Forage | 2026
- Artificial Intelligence Certification – Samsung Innovation Campus | 2025 – 2026
